Series Overview

Highly reliable, the unmanaged PoE switch is equipped with a high performance switching engine, has large buffer memory and optimizes transmission performance. The device supports long distance PoE, and the PoE port provides up to 30 W, making it suitable for small and medium sized settings that require PoE power supplies. It can operate in temperatures ranging -10°C to 55°C. It also features EMC and has protection against overvoltage, overcurrent, static electricity, lightning strikes, pulses and other types of interference.

Scene

Suitable for scenes such as houses, factories and offices.

Functions

Plug and Play
Hassle-free, it does not require any configuration. Simply use after it is powered on.

Easy Installation
Supports desktop, rack mounting and wall mounting, suitable for various scenarios.

Long Distance PoE
The transmission distance of a PoE port can be up to 250 m, meeting the requirement of wired transmission (bandwidth reduced to 10 Mbps).

Wide Operating Temperature
Supports working at ambient temperatures of −10 °C to +55 °C, and has built-in professional lightning-proof circuits that effectively reduce the impact of thunderstorms on network systems and improve system robustness, allowing the device to adapt to harsh environments.
